

CNMT 210 Forms Assignment Part 2

Points: 15

Date Due: 11/17/2015 12:00pm Central Time

This assignment builds on the Part 1 forms assignment. Take what you have built from that part and add HTML validation. Here is the truth:

- The name field should be required. A "Name" should allow for one to many words or numbers. A name should allow the use of periods (.), dashes (-), and commas (,). A name would imply that there might be spaces.
- A person filling out the form must select their student status.

Your grade may be reduced by up to 50% with improperly named files or inline styles. You may receive no credit if your assignment contains invalid HTML or CSS.
