

Assignment: Chapter 2 - Basic HTML

Points: 10

Professor: Steve Suehring

Course: CNMT210

Due: 9/10/2015 - At end of class

Create a new .html file (c2_html_assignment.html) and save it in the c2_html folder. Modify it to include the basic elements required to create an HTML5 file. (Include the correct DOCTYPE element, html element's/tag's lang attribute, and meta element/tag and attribute.

Add multiple comments below the opening <html> element:

- Your name
- Course number and name
- Professor's name

Also, add the following tags and content to the <body> tag:

- <h1> Tag containing the course name and number
- <h2> Tag containing your full name
- <h3> Tag containing the name of your major/degree.
- HTML compliant break element/tag.
- <p> Tag containing the content: Chapter 2 Assignment 1
- <p> Tag containing the content: Basic HTML5 web page
- HTML compliant horizontal rule/line

Assignment Submission:

When you have completed this assignment, validate it in the W3C validator and show the code and resulting page to me in lab.
