

CNMT 210 CSS Selectors Assignment

Points: 5

Due Date: 9/29/2015 10:00am

This assignment will illustrate the use of CSS selectors in new (well, maybe not new) but exciting ways. For this assignment, download the `css_selectors.html` file from D2L. The assignment will use an internal style sheet but you can optionally externalize the CSS at your option. ****Change all occurrences of my information with your own!!****

- Style the `h1` in the header so that it is centered, uses an Arial, helvetica, sans-serif font family in white, and has a rounded corners (see next page for a hint). Make the background color 60% opaque and the text 80%. Add the following padding declaration as well:

`padding: 10px;`

- Add a bottom border to all heading elements (`h1`, `h2`, `h3`) that is 2 pixels thick, is solid, and is black in color. You ***must*** use a group selector for this purpose. Use of three (or more) separate rules will not obtain points for this requirement.
- Style the `p` elements so that they are 1em in size and white in color.
- Style the lists so that they have green backgrounds, the example page uses `rgba(35,181,30,.3)` and a 2px white border. Remove the bullets from both lists and apply 10px of padding (see above).
- Make the first letter of each `li` within the contact info section large, as in the picture.

You can show this assignment to me in class or turn it in via D2L. As always, validate. Your HTML and CSS must be valid in order to receive credit.

Some CSS properties you may find helpful:

`text-align: center;`

`border-radius: 10px 10px 10px 10px;`

`background-color: rgba(45,30,181,.6);`

`border-bottom: 2px solid black;`

`border: 2px solid white;`
