

Assignment: Chapter 3  
Professor: Steve Suehring  
Course: CNMT210  
Points: 10 points  
Due Date: 9/17/2015

Start by creating a web site folder called "the\_halloween\_store". Within this folder create two folders: images and text. Next, copy the index.html file from Halloween Project Files on D2L to the root folder, copy the pumpkin.gif file to the images folder, and copy the index.txt file to the text folder. Note: When necessary, use relative referencing for all file links. **\*\*Add a comment below the <doctype> declaration with your name\*\***

### Specifications

- Create the home page from the index.html file that's in the root folder for the project. This file includes just the basic html elements.
- Add the HTML5 semantic elements to structure the page so it includes the following elements: one header, one section, and one footer.
- Add an image and two levels of headings\* to the header. You'll find the image, named pumpkin.gif, in the images folder. You'll find the text for the header as well as the main section and footer in the index.txt file in the text folder.
  - \* Place <h1> and <h2> elements -  
This will produce a warning in the W3C validator.
- Add three levels of headings\* and the required text to the main section. Boldface the last sentence of the guarantee.
  - \*In the <section> use an <h1>, <h2>, and <h3>
- Code the product categories as an unordered list with links to other pages. Because these pages don't exist, you can name them anything you like. However, you should assume that they will be stored in the products folder. (Use relative referencing)
- Add the required text to the footer, using a character entity for the copyright symbol.

Do not submit your work on D2L. During your designated lab time demonstrate your completed assignment to me after validating with the W3C.

Future chapter assignments may use this site as a base. Make sure that the site structure is set up correctly and you back up your work.

Note: Please do your own work and please do ask questions. Chances are that if you have a question, others do as well.
