

CNMT 210 Forms Assignment Part 1

Points: 10

Date Due: 11/17/2015 12:00pm Central Time

This assignment creates a page with a form. The form need not submit anywhere, so the action can simply be to #. HTTP method should be POST. The form uses multiple types of inputs along with fieldsets and legends; Be sure to provide a way for the user to submit the form.

Create a web form that gathers student information. Specifically:

- First and Last Name
- E-mail Address
- Student status (Freshman, Sophomore, Junior, Senior, Super Senior)
- Favorite types of classes, where they can choose more than one (Astronomy, Biology, Computer Science, Political Science, and so on - at least 10 choices)
- Whether they own any of the following three: Smartphone, Tablet, Laptop (Multiple choices ok)

There should be separation between the personal info (firstname, lastname, email, status) and their preferences (favorites, device ownership). The form fields and labels should align.

You will be graded not only on the functionality of the form but also the choice of input types for the various components (based on our class discussion).

Your grade may be reduced by up to 50% with improperly named files or inline styles. You may receive no credit if your assignment contains invalid HTML or CSS.
